

## [W3 HTML validator](#)

Comments about errors that I found:

I have a few errors related to setting a type="button" on <a> elements. Throughout the project I have been switching some buttons to links, but left the type="button" had been left on. I simply fixed that by removing the type.

In the ul list items that I generate for the how-to section in view-recipe.html, I had put a <br> outside each list item, which is not allowed, so I put the Bootstrap class mb-3 on the list items instead. I even think it looks better now, thanks W3 HTML validator!

## [W3C CSS Validator](#)

No errors at first check.

### W3C CSS Validator results for TextArea (CSS level 3 + SVG)

**Congratulations! No Error Found.**

This document validates as [CSS level 3 + SVG](#) !

## [JsHint](#)

There were some missed semicolons. Mostly on click event listeners. Once they were fixed, everything returned fine.

### Metrics

There are **15** functions in this file.

Function with the largest signature take **0** arguments, while the median is **0**.

Largest function has **8** statements in it, while the median is **1**.

The most complex function has a cyclomatic complexity value of **2** while the median is **1**.

### Eight warnings

14 Missing semicolon.

30 Missing semicolon.

46 Missing semicolon.

67 Missing semicolon.

88 Missing semicolon.

91 Missing semicolon.

97 Missing semicolon.

98 Missing semicolon.

## [Pep8 online](#)

I only got one indentation error, which was a quick fix.

Code	Line	Column	Text
<b>E125</b>	148	5	continuation line with same indent as next logical line
